To whom it may concern

I would like to take this opportunity to thank everyone at PCB Digital for your contribution on all LED display installations we have recently completed together. Your company's staff has been an absolute pleasure to work with throughout all the project installations across Australia. I would like to applaud your team on their project management, coordination, design, fabrication and installation skills. Above all, I have been most impressed with your team's ability to take on multiple installations, in different cities, at the same time. I definitely understand this was not an easy task and appreciate the effort PCB Digital put forth to make these installations successfully come together.

Secondly, I would also like to recognize your exceptional service delivery on this LED display network. Your dedicated technical staff members have achieved a level of responsiveness that has exceeded our expectations, which is absolutely essential when maintaining such a high profile LED network.

Overall, everyone at OAMM is proud to have PCB Digital on board as a trusted subcontractor and authorized service company. In addition to being pleased with your company's past performance, we are as equally excited to work with your team members over the coming months and years.

Regards,

Graison Burke

Manager
